“THE FIRST NAME IN FRUIT TREES™”

About Dave Wilson Nursery

Established by Dave Wilson in 1938 on a small piece of rented ground near Modesto, California, our company has grown to become one of the largest growers of deciduous fruit, nut and shade trees in the United States. Our main office and growing grounds are located east of Modesto in the Sierra Nevada foothills, near the town of Hickman.

Dave Wilson Nursery grows trees for both commercial orchards and the garden center industry, maintaining three sales departments that seek to provide the highest level of professionalism and integrity in the industry.

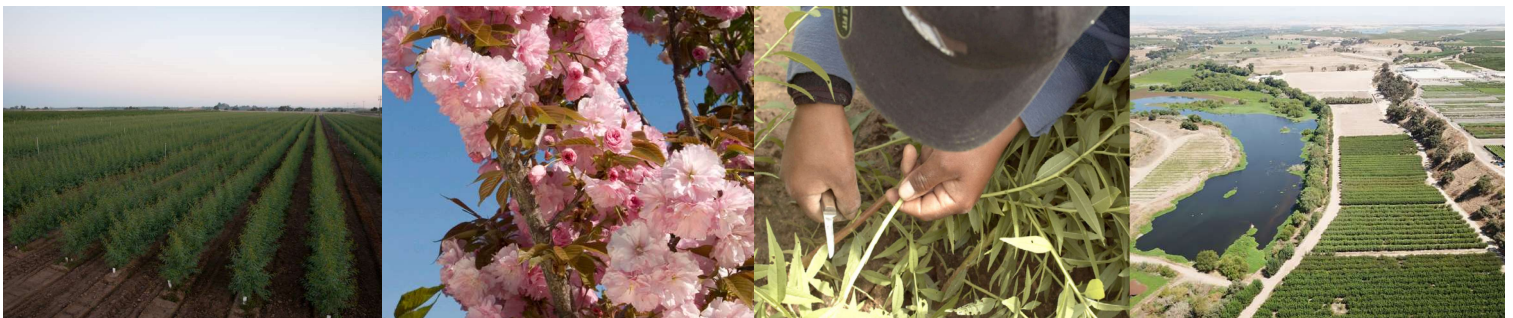

Dave Wilson Nursery is a family owned company. John Wynne, Dave Wilson's son-in-law, joined the company in 1950 and became a partner with Dave in 1951. John purchased the nursery's main office site along the Tuolumne River in 1967. Robert Woolley, John's son-in-law, joined the nursery in 1980 and, in 1989, Robert and his wife Jane (Dave Wilson's granddaughter) acquired the company. Dave Wilson Nursery became a California corporation in 1999.

In 1980, the nursery began a new wholesale bareroot program for independent retail nurseries. Early innovations included descriptive rootstock labeling and pricing based on customer performance. Most notably, a series of writeups and seminars begun in 1992 soon led to the now widely-practiced home fruit growing methodology known as Backyard Orchard Culture.

In 1995, we relocated our regional office and commercial fruit variety test block from Selma to its present location east of Reedley, California. Many of the new commercial stone fruit varieties from Zaiger Genetics of Modesto are marketed from this location.

To accommodate increased production and allow for longer periods of cover cropping in between nursery stock, Robert and Jane purchased the 640-acre Red Rock Ranch in 1996. We now farm more than a thousand acres on a four-year rotation, growing 5 to 10 million trees a year, depending on market conditions.

In recent years, Dave Wilson Nursery has greatly expanded its greenhouse and container production. Containerized commercial almond trees and specialty fruits for the retail nursery trade have become important complements to bareroot production.

OUR MISSION

To provide high quality, specialized fruit, nut & shade trees that foster sustainable gardening practices and inspire a deeper connection with nature. We are committed to offering expert advice, innovative solutions, and exceptional customer service, while ensuring every plant we offer thrives from our nursery to yours and beyond.

New 2027 Varieties

Blackberry 'Big Daddy'™

Thornless, Massive, juicy firm and flavorful berries with high yield. Easy picking, great for containers or raised beds. Upright growth habit. Growing Zones 5-9. Chill hours: 400 Harvest: June–July

Blackberry 'Columbia Star'

Developed for the home gardener from USDA-ARS and OSU. Ripens early summer. Highly productive, thornless trailing blackberry. Sweet superior flavor, large and firm uniform berries with a hint of tart. Great cold hardy alternative to marionberry. Growing Zones 5-9. Harvest July

Blueberry 'Burgundy'

A Northern Lowbush varietal. Small, tart old fashioned blueberry flavor.

Use for an edible creeping ground cover. New growth is coppery burgundy; unshaded foliage retains color. Sweet pink blooms in spring. Partially self-fertile will produce more with pollinizer. Full to part sun.

Growing Zones 3-6. Chill Hours: 1000+. Harvest: Late Summer

Blueberry 'Northblue'

PP33701

A compact 'half hybrid' of northern lowbush and highbush strains. Spring brings soft-pink blossoms which turn to dime sized dark berries mid summer. Cold-hardy, fall ornamental, partially self fertile, produces best with pollinizer.

Growing Zones 3-9. Chill Hours: 800+. Harvest: June–July

Blueberry 'North Sky'

PP25532

A low bush cultivar- Compact, cold-hardy. Great for containers. Berries are small, firm and very flavorful, dusty bloom gives them an attractive sky blue color.

Spring blooms produce snow white bell –shaped flowers in spring followed by dense glossy foliage in summer and deep red in fall. Growing Zones: 3-7 Chill

Hours: 1000+. Partially self fertile- produces better with pollinizer.

Harvest: June–July

Mulberry 'Mojo Berry'

A compact fast growing dwarf shrub. Prized for producing sweet, dark black berries. Produces fruit on new and old growth allowing it to produce from May to September. Great for patios or front yard edible ornamental. Can be trained up stakes. Growing Zone 7-10. Cold hardy and heat tolerant.

Raspberry 'Glencoe'

A thornless purple raspberry with rich flavor. Can be enjoyed fresh, in preserves, wine, & sauces. Grow in mounded rows, raised beds with wire supports to keep canes from falling over. Resistant to Verticillium wilt. Growing Zones 4-9. Chill Hours 800+. Harvest: June-July

Fruit Snacks® 'All Red'™ Apple

Columnar growth habit, Ideal for small spaces. Trees grow 8-10'tall and should be planted on 2"centers. Spring welcomes bright pink flowers that bring tart, tangy and sweet red fleshed apples. Great for fresh eating or baking. Special note: waxy red fruit with red flesh on the inside- this apple will not brown quickly so its perfect for slicing- no lemon juice needed. Growing Zones: 4b-8. Chill Hours: at least 500.

Fruit Snacks® 'Sweet Treat'™ Apple

Columnar growth habit, vigorous grower with a narrow footprint. Ideal for small spaces.

Trees grow 8-10'tall and should be planted on 2"centers. Red over green blushed skin open up to a delicate balance of sweet and sour. Blooms mid spring for harvesting mid season. Growing Zones: 4b-8.

Chill Hours: At least 500. Cold-Hardy and has good apple scab resistance.

THIS IS A WHOLESALE PRICE LIST
INTENDED FOR THE NURSERY TRADE ONLY

New Discount Terms for 2027!

All trees are offered at a flat price making it easier than ever to plan and budget your orders. To reward larger purchases, we've introduced a new volume discount system — any order that reaches or exceeds \$10,000 automatically qualifies for a discount.

Please see the discount tier table below to see which rate applies to your order total.

Tier 1	Tier 2	Tier 3	Tier 4	Tier 5
4%	7%	9%	11%	13%
\$10,000-24,999	\$25,000-\$49,999	\$50,000-\$99,000	100,000-249,999	\$250,000 +

TERMS - NEW ACCOUNTS

New customers who want approved credit for the 2027 season must submit a credit application by November 1st, 2027. Application forms are emailed or faxed upon request. After November 1st, 2027 orders from new customers must be prepaid within 10 days of order. Orders requiring pre-payment are not held past the payment due date. Credit Card payments are not accepted, unless prior arrangements are made.

MINIMUM ORDER

The minimum order is 200 trees or 1 pallet of potted plants. Plants must be ordered in bundle quantities. Trees 3/8" and smaller are ten to a bundle; 1/2", 5/8", 3/4", and 1" are five per bundle, 1 1/4" up are three per bundle.

REVISIONS, CONFIRMATION & FULFILLMENT

Revised, or Initial Order Copies are usually sent within 14 days of receipt of order. Confirmations are based on estimates. Quantities and sizes are subject to change due to weather, crop loss, etc. Customers should expect some substituting according to their size preferences. Substituted sizes are invoiced at corresponding prices. Customers may limit their acceptable sizes to two sizes that fit the items' sizing code. However, limiting your size preferences increases the probability you will be zeroed on delivery. Notifications are not possible for items zeroed in sizing. Overpayments will be refunded. In confirming orders it is our practice not to oversell; we endeavor to ship quantities and sizes as confirmed.

ORDER CHANGE DEADLINES / RESTOCKING FEE

Due to order allocation workload between November 15th, and December 15th we suspend order changes during that time. Order additions and new orders received during that period will be processed after December 15. **Order decreases are not permitted after November 10 for bareroot material. The deadline for Potted Material revision's is October 15th. Restocking fees of 25-50% will apply.**

SHIPPING

Orders are shipped based on product readiness mid-December to late January unless a later date is preferred. Items not ready at time of first shipment (e.g. shade trees) are shipped as soon as possible. Shipping season ends March 15th.

Note: Customers' preferred ship times are not promised - The shipping schedule is dependent upon weather, holidays, and order volume for each area. Orders delivered within California via

Dave Wilson Nursery truck before March 1st are FOB destination, Freight Prepaid or Freight percentage for bareroot and potted will be added. Later California shipments, remote shipments, box and ship orders may not conform to these shipping rates. Freight charges for other western states are F.O.B. Hickman, California. Shipments outside of California, not on a DWN truck, are sent "Best Way" at cost. If you would like to arrange your own preferred carrier, please do. Arrange through your salesman potential "will call" dates.

ORDER PICKUP

Only prepaid orders and orders for established customers may be scheduled for pickup. Over-the-counter sales are not offered

COLD STORAGE

Cold storage fees are priced at cost. Typical rates are \$135.00 per bin for the first month, \$65.00 per bin for additional months. Rates are subject to change.

LIMITED WARRANTY

All nursery stock is warranted to be true to name as labeled and in good live condition at the time of delivery. Due to the perishable nature of nursery stock there is no warranty after receipt by the retail customer. Claims for damaged or unsatisfactory stock or shortages must be made within five days of receipt of order. In no case is Dave Wilson Nursery responsible for more than the purchase price of the stock.

PREPAYMENT DISCOUNTS:

November 1st for customers with approved credit paying by check, money order, or EFT.

6% order discount available for orders without deposits for payment in full.

Freight related charges are not discounted. Payment discounts taken on invoices are deducted from any subsequent credits. Pending credits **DO NOT** augment payment due dates and discount terms. Payment discounts apply to nursery trade resellers only. Customers without approved credit are not eligible for payment discounts.

POTTED FRUIT PROGRAM

Farmers' Market Favorites™

Plants are grown in 4 x 4 x 9" pots & shipped dormant on double tiered wooden racks. Each rack holds 18 display boxes for a total of 216 plants. Mix and match cases for a customized order. Minimum of 12 plants per variety. 1 rack minimum. Freight delivered within California via Dave Wilson Nursery truck in November or February. Freight charges for other western states are F.O.B. Hickman, California. Minimum freight charge for out-of-state shipment is \$100.00. Shipping Racks are required on most common carrier loads. \$60, or \$40 for a half rack

Bareroot Care Tips

To ensure the best results with your Dave Wilson Nursery bareroot trees, here are a few suggestions:

- Upon receiving your trees, immediately heel them in to moist shavings or sand. The root system must stay covered and moist at all times. It is also beneficial to mist/spray your bareroot trees during prolonged dry periods. **DO NOT SOAK IN WATER FOR EXTENDED PERIOD OF TIME.**
- Have the necessary supplies ready to display your trees. Have your bins for storage/display or pots and soil at the ready for potting. When potting your trees be sure to use the highest quality soil mix available.
- We strongly suggest a retail grade dormant pruning on all fruit trees, especially on almonds, peaches and nectarines. It is imperative to uniformly top and thin the branching structure on stone fruit to ensure a healthy vigorous tree.
- DORMANT SPRAY- Your Dave Wilson Nursery fruit trees have had 2 treatments of dormant spray before leaving our yard. As you know, the most important time to prevent leaf curl is to dormant spray right before bud break. Thus, it is imperative for you or your customer to apply that final dormant spray just before bud break. This should also be done with all of your fruit tree stock.

Mature Size of Fruit Trees

All deciduous fruit trees may be held to any chosen height by pruning. For the typical backyard planting, Dave Wilson Nursery recommends keeping fruit trees no more than eight feet tall by summer pruning. Please refer to the paper, Backyard Orchard Culture.

Note: approximate mature tree heights stated in this price list assume only minimal winter pruning.

IF YOU HAVE ANY QUESTIONS AT ALL, PLEASE CONTACT YOUR
DAVE WILSON NURSERY REPRESENTATIVE.

U.S. PLANT NOTICE Asexual propagation of any plant which is patented or has a patent pending is prohibited by the U.S. Plant Patent Act. Varieties and rootstocks marked by an asterisk (*) are patented, patent pending or proprietary items.

RETAIL SALES AIDES & REFERENCE MATERIALS

____ **5791 BOOKLET** Descriptions of Varieties & Rootstocks, key characteristics of all varieties offered, including winter chilling and pollination requirements for fruiting plants. 50-page booklet, plus postage. Published annually. \$2.25 plus postage.

____ **5869 BIN TAGS** Custom 11" x 7" laminated full-color bin tags ("Floracards") with variety description and harvest date (with same photo and text as picture tags). Delivered with orders. All others add postage. \$3.50 each

____ **5784 CUSTOMIZED DESCRIPTIVE HANDOUT** Retailer's name, address and phone number followed by descriptions of the plants ordered. Available to retailers ordering 25 or more varieties of plants. Original provided online. Items added after November 1st will not be included. Not available for orders placed after Nov. 1st

____ **5790 WALL CHART** Fruit & Nut Harvest Dates 23" x 27" Multi-color chart shows approximate harvest periods for over 325 fruit and nut varieties at Hickman, California. For use in planning and promoting successive ripening in backyard orchards. One chart sent upon request.

____ **900322 WALL CHART OUTDOOR** Fruit & Nut Harvest Dates 23" x 27" Multi-color chart shows approximate harvest periods for over 325 fruit and nut varieties at Hickman, California. For use in planning and promoting successive ripening in backyard orchards. \$40.00

Additional Charts

\$1.50 each + postage & handling.
Postage & Handling:
Less than 10 charts = \$5.00,
10-24 charts = \$7.50,
25 or more charts = \$0.30 each

MISC & SHIPPING CHARGES:

Shipping Cartons 1"x16" x 84"	\$25.00
Phytosanitary Cert (County Hourly Charges)	\$87.00
Overtime Rate Charges	\$125.00
Certificate Charge	\$40.00
Wooden Shipping Racks for Potted Material	\$60.00
½ Rack for Potted Material	\$40.00
Unpotting/Root washing per plant	\$1.25

Cold storage charges billed at actual cost and may vary by season. Current rates available upon request.

All Trees may be held to any desired height by summer pruning

M7 : Good anchorage, Unpruned tree height 2/3 of standard. Induces early & heavy bearing. Resists fire blight & powdery mildew. Moderately resistant to collar rot. Winter hardy, widely adapted.

M-111: Excellent all around rootstock for apples. Tolerates wet, dry, or poor soil. Resists Woolly Aphids and collar rot. Induces bearing at young age. Unpruned tree height 80-90% of standard

GENEVA 969: Well anchored tree 50% of standard high resistance to Woolly Aphids and fireblight. Medium resistance to crown & root rot. Few suckers, Precocious & productive. Provide adequate drainage

MAHALEB: The most winter hardy of the cherry rootstocks. Induces bearing at a young age. Resists crown gall, bacterial canker & some nematodes. Not tolerant of wet soils. Standard varieties slightly dwarfed, to about 85% of their height on mazzard or about 25-35 ft if not pruned.

MAXMA14: Dwarfing rootstock for sweet cherries. Dwarfed to about 2/3 of standard. Less dwarfing expected in fertile loamy soil. Induces early heavy bearing. Good tolerance to wet soils, performs well in calcareous soil. Resistant to bacterial canker & nematodes. Well anchored, very little suckering.

MAZZARD: Vigorous and tolerant of wet soils slightly more than Mahaleb. Good drainage still necessary. Resistant to root knot nematodes and oak-root fungus. Unpruned height of standard varieties, 30-40 ft.

CITATION: For Nectarines, peaches, apricots & plums. Dwarf peaches & nectarines 8-14 ft apricots & plums 12-18 ft. Very tolerant of wet soils, not drought tolerant (Induces early dormancy in dry soil) Very winter hardy. Resists root knot-nematodes. Induces heavy bearing at a young age.

LOVELL: For nectarines, peaches, apricots , plums & almonds. Vigorous, more tolerant of wet soils than nemaguard, also more cold hardy. Susceptible to nematodes in sandy soils. Unpruned tree height of standard varieties 15-25 feet.

NEMAGUARD: For nectarines, peaches, apricots, plums & almonds. Vigorous, resistant to root knot nematode an excellent rootstock for well- drained soils. In slower-draining soils, plant on mound or berm. Unpruned tree height 15-25 feet.

MYRO29C: Shallow but vigorous root system tolerates wet soil. Resists oak-root fungus and root-knot nematodes, and has some resistance to oak-root fungus. Widely adapted, excellent all round rootstock for almonds, apricots & plums. Unpruned tree height is 15-25 feet.

CALLERYANA: Used for Asian and flowering pears, especially in warm winter/hot summer climates. Sandy or heavy soils. Asian pears on Calleryana are comparatively small, unpruned tree height 15-20 ft. Heavy bearing at a young age.

--------------	-------------------------------------

INTERSPECIFIC & HYBRID HIGHLIGHT

Notes: Large yellow/gold, low acid, semi-freestone. When firm ripe is tangy and soft ripe offers a sweet and rich apricot flavor. Reliable bearer.

Aprium
A complex hybrid of
Apricot & Plum.

SEASON: Mid
FERTILITY: Self-Fertile
BLOOM: February
ZONE: 7-10

Notes: Flavorful & tangy clingstone. Heavy crops, very productive even under adverse conditions. Dark purple skin over light green flesh. Pair with Sprite

Cherry-Plum
Japanese Plum x Cherry Plum

SEASON: Mid
FERTILITY: Pollenizer Req
BLOOM: Late March
ZONE: 4-9

Notes: A mild, classic white peach sweet with a delightful plum aftertaste. Superior quality canning clingstone.

Peach-Plum
Peach x Plum

SEASON: Early
FERTILITY: Self-Fertile
BLOOM: Mid March/April
ZONE: 7-10

Notes: The best qualities of all its parents, slightly fuzzy skin like a peach, bright gold flesh like an apricot and tart skin like a plum that gives way to a delightfully sweet bite. Pair with any Pluot or Japanese early blooming plum.

Peacotum
Peach x Apricot x Plum

SEASON: Early
FERTILITY: Pollenizer Req
BLOOM: Early March
ZONE: 4-9

Pluerry
A complex hybrid of
Japanese Plum & Sweet
Cherry

SEASON: Late
FERTILITY: Pollenizer Req
BLOOM: Mid April

Notes: Extremely high flavor with orange skin blushed red and red/orange flesh. Long hang time. Pair with Flavor King or Emerald Beaut.

Plumcot
Japanese Plum x Apricot

SEASON: Early
FERTILITY: Pollenizer Req.
BLOOM: Early March
ZONE: 7-10

Notes: Medium sized fruit with translucent golden color. Light red blush & slight pubescence. Excellent flavor with firm juicy flesh.

Pluot
A complex hybrid of Plum
& Apricot

SEASON: Late
FERTILITY: Pollinator Req
BLOOM: Early March
ZONE: 5-10

Notes: Taste test winner. Creamy white & red fleshed freestone with wonderful apricot flavor. Pair with Flavor Supreme, Flavor King, Santa Rosa

Nectarplum
Nectarine x Plum

SEASON: Mid
FERTILITY: Self-Fruitful
BLOOM: March
ZONE: 6-10

Notes: Ornamental & edible. Tremendous purplish pink blooms in spring followed by a flourish of red leaves which mature to lush green in late summer. Unparalleled taste of nectarine & plum traits.

Meet Our Team

At Dave Wilson Nursery, our team is structured to support your success—from planning, ordering, delivery and long-term partnership. Our sales, support, and leadership teams work together to provide regional expertise, responsive service, and reliable execution at every stage.

Wholesale Sales Team

Your primary point of contact for planning, product selection, and territory-specific support.

Kristin Camarena

Wholesale Division Director
209-596-6706
kristin@davewilson.com

Leads wholesale strategy and supports key accounts across all regions.

Lloyd Cassidy

Territory Manager
530-230-8733

lloyd@davewilson.com

Territory: Northern CA, OR, WA, ID, NV, and UT. Focused on retail and wholesale nursery support, assortment planning, and regional product alignment.

Brandi Rohr

Territory Manager
209-579-1131

brandi@davewilson.com

Territory: Southern CA (Bakersfield South), AZ, NM, and CO. Specializes in supporting high-volume nursery customers and tailored product programs.

Michael Barthel

Territory Manager
602-708-8377

Mikeb@davewilson.com

Territory: TX, OK, AR, LA, FL, AL, GA, SC, NC, VA, MO, IN, and Northeast. Dedicated to supporting retail and wholesale nurseries and developing product selections that drive success.

Sales Support Team

Our support team works together to ensure the best quality, accurate orders, efficient logistics, and clear communication from start to finish.

HOW TO ORDER

If mailing or faxing, you may use this price list/order form, or your reserve order with changes indicated and/or a separate sheet of paper. When mailing or faxing your order, please provide the information outlined below. If you place your order by mailing this price list/order form, we will send you another price list with your confirmation.

New customers who want approved credit terms for a 2027 order must submit a credit application by November 1st, 2026. Application forms are mailed, faxed or emailed on request. For information regarding minimums, price categories, discounts, order confirmation and warranty please refer to page 2.
